

Balasubramaniyan Prasad

Phone: 9840757120 & E-mail: iyanprasad5221@gmail.com

Place: Chennai | Nationality: India

DOB- 05/02/2001 | Passport - V3504513

Results-driven and highly adaptable technology enthusiast passionate about exploring cutting-edge innovations in AI, Cloud Computing, and Software Development. Possessing strong foundations in Python, Java, SQL, Web Application Development, and AWS, with a continuous drive to learn, build, and innovate in the rapidly evolving tech landscape. Known for quickly adapting to new technologies, solving complex problems creatively, and bringing a growth mindset focused on delivering impactful real-world solutions. Eager to contribute fresh ideas, technical excellence, and high-energy collaboration within forward-thinking organizations.

Work Experience:

Full Stack Developer

LTIMindtree | Chennai

(Sept 2025 – Present)

- Developed and maintained web applications using Angular and .NET Core
- Built and consumed RESTful APIs for dynamic data handling and integration
- Implemented authentication and authorization using JWT
- Fixed bugs and improved application performance and responsiveness
- Worked with SQL Server, PostgreSQL, SQLite for data storage, queries, and optimization
- Collaborated with team members to deliver features within deadline
- Worked on Power BI for Sales Analytics Dashboard.
- Trained an agent for upgrading an angular 4 application to higher versions with Prompt Engineering.

Academics:

MCA – SASTRA Deemed University, Thanjavur (2023 - 2025)

CGPA: 8.44

B.Sc Aviation – Remo International College

Alagappa University 2019 – 2022

Percentage: 85.0%

Higher Secondary School

PMS Matriculation Higher Secondary School, 2018 – 2019

Percentage: 67.3%

Technical Skills

- **Programming Languages:** Java, Python, C#
- **Framework:** React.js, Django, .Net ASP MVC Core, Angular

Interpersonal Skills

- Strong Communication Skills
- Problem-Solving Mindset

- **Stack Tech:** Full Stack - MERN Stack, Dotnet full stack
- **Database/Cloud:** SQL Server, SQLite, Amazon AWS, MS Azure
- **Hands-on Systems:** Unity 3D, Blender, Adobe Premiere pro, Git, VS Code, Postman,
- **AI/ML Technologies:** Gen AI, Prompt Engineering, OpenAI API, LLM Integration, Machine Learning
- **Data Analytics & BI:** Power BI, Excel, SQL Analytics
- Adaptability
- Team Collaboration
- Time Management

Achievements:

- Certified Top 5 Performer in Unity Game Designing and Development (inter-dept).
- Won in Debate on “Is technology good or bad?”

Projects:

- **Using Virtual Reality to Enhance Pedestrian Road Safety through Vehicle Speed Anticipation:**
This project uses Virtual Reality (VR) to create a safe, realistic environment where pedestrians can practice crossing roads by anticipating vehicle speed and distance. The goal is to help people make safer decisions when crossing, reducing accidents and improving road safety in urban areas.
Tech Used: Unity 3D, Blender, C# Scripts, AR/VR, Visual Studios, Adobe Premiere Pro
- **Efficient Deployment of Web Application Using Cluster Creation and Resource Allocation in AWS Cloud:**
Engineered a highly scalable, cloud-native web application on AWS using the MERN stack, incorporating LSTM-driven predictive analytics for intelligent demand forecasting. Designed an elastic architecture with EC2 Auto Scaling Groups (ASG), Elastic Load Balancing (ELB), and AWS CloudFormation for infrastructure as code (IaC). Optimized computational efficiency through distributed data processing with Apache Spark and conducted performance stress testing using Apache JMeter to ensure high availability, fault tolerance, and cost-effective scalability.
Tech Used: React.js, LSTM ML Model, Express, MongoDB, AWS Cloud, RazorPay (Payment solution).
- **Real-Time AI-Based Multi-Person Detection and Counting System Using YOLOv8 and OpenCV**
Developed a high-performance real-time people detection and crowd analytics system using Python, YOLOv8, OpenCV, and Deep Learning. Built an intelligent computer vision pipeline capable of accurately detecting, tracking, and counting multiple individuals through live video streams with optimized speed and precision. Enhanced detection performance across crowded environments, low-light conditions, and complex backgrounds, showcasing advanced expertise in AI, Computer Vision, and real-time surveillance automation.
Tech Used: Python, YOLOv8, OpenCV, Deep Learning, Computer Vision, NumPy.

Additional Courses:

- Machine Learning A-Z: AI, Python & R – Udemy
- Web Development Course - Udemy

Declaration:

I, Balasubramaniyan, hereby declare that the details furnished above are correct and true to the best of my knowledge and belief.
